

Assignment 2

Objective :

To develop skills in reviewing previous research, identifying research gaps, and formulating clear research questions, research objectives, and hypotheses.

Assessment Criteria :

Criteria	Marks (%)
Literature review summarizes at least 3–5 relevant studies with proper citations	2
Research objectives are clear, specific, and aligned with the problem statement	2
Hypotheses (if applicable) are logical and derived from literature	1
Total	5

Instructions :

- Literature Review** (1–2 pages) :
 - Review and synthesize at least **3–5 relevant previous studies**
 - Compare findings from previous studies rather than only summarizing each study
 - Use citations properly (APA style)
- Research Questions** :
 - Formulate **2–3 clear and focused research questions**
 - Ensure the questions address the research problem identified in Assignment 1
- Research Objectives** :
 - Formulate **2–3 specific and measurable research objectives**
 - Ensure each research objective corresponds directly to a research question
- Hypothesis** (if applicable) :
 - State **H_0 and H_1** where appropriate
 - Ensure the hypotheses are testable and aligned with the relevant research objective(s)

✦ *Tip: Ensure your objectives and hypotheses directly link to the problem statement from Assignment 1.*
